## **Unity Scientific Announces Business Structure Change**

**Purcellville, VA – May 23, 2005** – Unity Scientific, a global leader in Near-Infrared Spectroscopy, has announced that it will change its corporate structure from an LLC (Limited Liability Corporation) to a C-Corporation beginning at midnight of May 30<sup>th</sup>, 2005. The company has experienced a very fast pace of growth over the last three years that has prompted this change in how the company was incorporated.

“Changing the company from an LLC to a C-Corp will have a positive impact on our business by allowing Unity to organize a corporate structure that will further benefit our current employees along with being able to attract top talent to fill positions as the company rapidly expands by taking advantage of the additional flexibility that a C-Corp offers,” comments Doug Evans, President of Unity Scientific. In addition, Mr. Evans pointed out that this change is solely an organizational change on how the company is legally structured and will have no affect on its customers or business practices.

Unity Scientific is headquartered in the Washington DC area with a European center in Germany, a Pacific Rim center in Australia, and regional sales offices located in other major cities worldwide.

*Unity Scientific, Inc., is a recognized worldwide as a technological leader in Near-Infrared spectroscopy with over 2,000 instruments installed. The company offers both bench-top and process analysis for a variety of industrial and Food applications.
