Unity Scientific Announces the Appointment of John W. Shenk

John W. Shenk to head Unity's Support Group

Purcellville, VA – June, 2005 – Unity Scientific, Inc., a leading global supplier of NIR spectrometers, is proud to announce that John W. Shenk has joined the company to head up the customer support department. Mr. Shenk has an extensive background in NIR analysis and previously worked for ISI, a division of Foss. Unity's rapid growth has made it necessary to strengthen the area of customer support for both pre-sales and post-sales activities. John will be responsible for some other general administration management responsibilities in conjunction with the task of developing a world-class support system within the young and growing company.

Doug Evans, President of Unity Scientific comments " John is well known within the NIR world and brings a host of valuable skills to the Unity family. We are very lucky to have John aboard and we are confident that he will make an immediate impact both internally and externally." Mr. Evans went on to say " John has worked his entire career in the field of Near-Infrared and has devoted many years to establish new milestones within the technology. This addition will further strengthen Unity's position as a leader in the field and cement our commitment to deliver innovative solutions for hand-held, bench-top and process NIR analysis."

Headquartered in Purcellville, VA, Unity Scientific, Inc., is recognized worldwide as a technological leader in Near-Infrared Spectroscopy. Additional information on the SpectraStar series of analyzers or any of the many other Unity products can be obtained by writing to Unity Scientific, Inc., PO Box 1030, Purcellville, VA 20134; by calling (540) 338-8991; or by visiting www.unityscientific.com.
