## PRESS RELEASE

### Unity Scientific Moves Headquarters to Milford MA

**Milford MA, July 29, 2016** – Unity Scientific announced that it has moved its headquarters and US base of operations and manufacturing from Brookfield Connecticut to Milford Massachusetts, approximately 40 miles west of Boston. Unity Scientific has moved into an expanded and newly remodeled facility and will be co-located with its sister company, Process Sensors Corp., both part of KPM Analytics. Recent renovations to the facility include new production and test areas, engineering labs, communications updates and conference and training room additions.

“This investment in a new facility will enable Unity to continue to expand while providing the highest level of support for customers and partners” explained Chris McIntire, CEO of KPM Analytics. “The added benefits of co-locating with sister company, Process Sensors, will further enhance both day to day and longer term collaboration. We have extended the lease at the facility and have room to grow.”

For customers and distributors, the telephone numbers and email addresses will be unchanged, with only the mailing address being updated. The entire North American and International field sales and support groups will also remain the same. Unity has successfully completed the move, and the business continued without interruption during the transition.

“The Milford plant is a major expansion and modernization for our Research and Engineering facility and our manufacturing assembly space,” adds Doug Evans, VP Sales. “The extra room is just in time to keep pace with the increased demand of our two new NIR product lines – SpectraStar XT series and the Moisture Analyzer series.”

with over 6,000 wet chemistry analyzers. The corporate headquarters including engineering and production is located in Milford, MA USA. The European headquarters is located in Weiler bei Bingen outside Frankfurt, Germany. For more information, visit [www.unityscientific.com](http://www.unityscientific.com).

#### **About Process Sensors Corp.**

Process Sensors is a leading manufacturer of on-line near infrared (NIR) moisture sensors for the continuous monitoring and measurement of moisture, coatweight, oils and other constituents, in the manufacture of food products (including snack foods), animal food, wood products, and tobacco, as well as the paper/converting industry, pharmaceutical manufacture, the chemical industry, minerals and various bulk materials, and a wide diversity of other manufacturing industries throughout the world. The corporate headquarters including production is located in Milford, MA, USA, and sales offices are located in Franklin Lakes, NJ, USA, Corby, UK and Warsaw, Poland. For more information, visit [www.processsensors.com](http://www.processsensors.com) and [www.processsensorsir.com](http://www.processsensorsir.com).

#### **About KPM Analytics**

At KPM Analytics, we take great pride in what we do. Our premium brands provide instrumentation solutions for many industries and markets. From food quality and safety to environmental and agriculture, our customers turn to us for their advanced scientific instrumentation needs. Its market-leading brands include Unity Scientific (MA, USA), Process Sensors Corporation (MA, USA), and CHOPIN (France).
